

PRODUCTIVITY NEVER LOOKED SO TOUGH.

Meet the new Dell Latitude Rugged family and discover how it was made to surpass standards and set the bar when it comes to toughness.

Your field workers and their PCs can take a beating. So can the new family of Dell Latitude Rugged 5000 and 7000 Series laptops, featuring up to 8th Gen Intel® Core i7 processors and a brighter screen for outdoor viewing. Featuring intuitive hot swappable dual batteries, industry-standard USB 3.0 Type C connectivity and quick in-vehicle docking, they'll keep your end users protected and productive - no matter what their job throws at them. Trained and tested to withstand some of the world's toughest jobs, each system is subjected to military-standard 810G testing and offers Dell ProSupport Plus with SupportAssist, the only available premium service for PCs and tablets that automates support to prevent issues before they occur and quickly resolve issues when needed. The result: a smarter, tougher, more capable Rugged line than ever before.
