

Aruba offers market leading technology – here's proof:

1. Leader in wireless

Aruba was named leader in Forrester's New Wave.™ Wireless Solutions report (Q3 2019).

Forrester says:

// Customers praised Aruba Networks' rich management interfaces, monitoring tools, and location services, especially the ability to connect IoT devices using wireless options outside of just using Wi-Fi with Aruba's access points (APs). //

Aruba received the highest possible score on these and other criteria:

- Wireless connectivity options
- Wireless hardware options
- Security

2. Leader in Worldwide Enterprise WLAN

Aruba was named a leader in IDC's MarketScape report (2019)

IDC says:

// IDC recommends considering Aruba for environments where wireless security and performance requirements are paramount. Aruba is a good option to consider for end users with more advanced Wi-Fi-based IoT deployments. //

// Aruba's breadth and depth in terms of verticals, geography, and architecture lead it to be included in a wide variety of consideration sets, and it has demonstrated notable success in the high tech, education, government, healthcare, retail, and financial verticals. //

3. Leader in Gartner's 2019 Magic Quadrant

Aruba was once again recognised as a leader in Gartner's Magic Quadrant for the Wired and Wireless LAN Access Infrastructure report (2019)

Gartner says:

// HPE (Aruba) received the highest score in five out of the six use cases in Gartner's 2019 Critical Capabilities for Wired and Wireless LAN Access Infrastructure report. //
