Lenovo

For businesses, ensuring sustainability and reducing the global carbon footprint of operations is a top priority. To assist customers on their sustainability journey, Lenovo partners with leading certified providers of CO<sub>2</sub> Offset Services.

The **CO<sub>2</sub> Offset Service** gives organizations the chance to compensate for emissions by investing in environmental schemes. If you're looking to drive sustainability in your business, Lenovo CO<sub>2</sub> Offset Service supports several different initiatives which include new or extensions of existing projects, windmills, solar cells, and biomass among others.

## How?

It's incredibly simple to offset CO<sub>2</sub> emissions with Lenovo:

Choose your CO<sub>2</sub> Offset option (integrated into the Serial Number) when ordering eligible devices.

Once products are shipped, Lenovo reports to its official CO<sub>2</sub> Offset partner.

Lenovo's CO<sub>2</sub> Offset partner finalises the transaction and issues a unique certificate with specific HW Serial Number(s), which Lenovo provides to your organisation.

## Why?

Lenovo offers a seamless process, requiring no additional effort, to reduce your business' environmental impact:

Included in the hardware transaction, CO<sub>2</sub> Offset Services are easy to implement.

CO<sub>2</sub> compensation is based on realistic emission by product, covering production, shipment and a typical 5-year usage cycle.

CO<sub>2</sub> Offset Services offer a tailored approach to CO<sub>2</sub> compensation, directly linking to products purchased.

## Dedicated to sustainability

Lenovo is a leader in sustainability and is named as one of the 100 most sustainable companies in the World Index. In 2019, Lenovo was rated AA on the Hang Seng Corporate Sustainability Index, and achieved the best overall score in the IT industry.
