

## Keep your business to yourself

Professional solutions expertly designed to protect your conversations & data

### DID YOU KNOW?

Cybercrime is on the rise. In fact, in 2025, cybercrime costs are expected to hit **10 TRILLION USD\***, affecting **84% OF BUSINESSES.\*\***

With a huge increase in cyberattacks, protecting your conversations & data is more critical than ever before. But how do you know how secure your products are? At Jabra, we built enhanced security into our solutions from the get-go. From end-to-end encryption to rigorous testing and development, we do everything we can to keep your data secure now and in the future.

### KEEP YOUR DATA TO YOURSELF

We're committed to protecting your data with rigorous development and testing procedures.

- + Cross-GN Cyber Security Center of Excellence
- + Nine in-house hackers stress-test solutions before they reach you
- + Threat models for each product ensure security at every stage

### KEEP YOUR CONVERSATIONS TO YOURSELF

We strive to meet the highest security standards in our products, so you know you can always trust our technology.

- + Products kept compliant with the latest regulatory standards keep your business ahead of threats

### KEEP YOUR PERSONAL DETAILS TO YOURSELF

We build products with end-to-end, integrated hardware and software security for secure communications and personal data protection. Because the only people on your private call should be the ones invited.

- + Advanced encryption & Microsoft Azure keeps personal data safe for Jabra+
- + Malware-proof peripherals with secure chipsets that only allow authorized firmware
- + Secure audio & video streaming prevents man-in-the-middle attacks
- + All suppliers & partners undergo strict security vetting

### Keep your future business to yourself

We're continuously reviewing, developing and evolving our security to protect your business from threats now and in the future.
